

The new standard in cue sheet technology

RapidCue is a state-of-the-art application that allows you to enter, manage and electronically submit your cue sheet data to ASCAP and BMI.

RapidCue provides data storage for the exclusive use of each supplier.

RapidCue is the most efficient, user-friendly means to securely enter and submit cue sheet data.

- ✓ Increases efficiency and productivity through a secure, automated environment
- ✓ Validates and resolves new, duplicate and revised cue sheet data
- ✓ Ensures that only correct, complete cue sheets are submitted
- ✓ Enables accurate receipt and tracking to ensure that all cue sheets reach the intended destination
- ✓ Provides electronic notification regarding the acceptance or rejection of submitted cue sheets

Secure

- ✓ Allows your organization to choose a web-based or batch solution for your cue sheet needs
- ✓ Allows access to your organization's repository by authorized users from any location via the internet
- ✓ Offers client-controlled security and access to information using advanced technology

Automated

- ✓ Provides a repository for all your cue sheets, songs and entitled parties
- ✓ Offers client-controlled, automated cue sheet workflow
- ✓ Enables trouble-free cue sheet exchange among RapidCue participants

Collaborative

- ✓ Technology is compatible with multiple operating systems and browsers
- ✓ One RapidCue batch format represents all necessary cue sheet elements
- ✓ Supports XML and FTP technology for batch participants

Who developed RapidCue?

Jointly developed by BMI and ASCAP over a four-year period, RapidCue combines the expertise and experience of the Performing Right industry's largest and most technically advanced organizations. Seeking a true industry standard, they developed an advisory committee comprising representatives from film and television production companies and television networks to test the application and to provide feedback. You reap the benefits of a product developed in response to challenges from clients like CBS, NBC, Disney, Fox, Sony, and Paramount.

What does RapidCue do?

RapidCue increases efficiency and productivity through automation. Multiple users within your organization can enter cue data in the system, which allows them to securely share your organization's data and/or retrieve previously submitted cue data for revision.

RapidCue ensures that only correct and complete cue sheets are submitted.

RapidCue's "Submit" function enables accurate receipt and notification to ensure that all cue sheets reach their intended destinations and provides the submitter with electronic notification and acknowledgment of the received cue sheet(s).

Can anyone on RapidCue see my data?

You, the customer, designate and manage the authorization levels to ensure the highest level of protection and confidentiality.

Your management of security ensures that no access will be given to unauthorized parties, and that company-specific data will be accessible only to your organization's authorized users.

Can I share my data with other companies?

RapidCue's "Transfer" functionality allows your organization to share cue sheet information with other organizations who participate in RapidCue..

RapidCue's cue sheet "Print" functionality allows you to produce an electronic or hard-copy version of your cue sheet.

Is Training Available?

Yes. Simulations and telephone help are available for your organization at no cost!
